ASHUTOSH SINGH

Full Stack Developer

OBJECTIVE

Dedicated and skilled Full Stack Developer with a year of experience crafting robust web applications. Proficient in a range of frontend and backend technologies such as HTML, CSS, Bootstrap, Python, JavaScript, ReactJS, React Native and Django.

WORK EXPERIENCE

Full Stack Developer

Techpath | Mughalsarai

- Worked for more than one year from December 2022 to January 2024 and created an android app using React Native.
- Developed and maintained web applications using HTML, CSS, Bootstrap, Python, and JavaScript, ReactJS.
- Implemented backend functionality using Django, ensuring seamless integration with the frontend.
- Conducted thorough testing and debugging to optimize application performance.

Projects

Gym Website

- Created a fully responsive Gym website using HTML, CSS, Bootstrap.
- Implemented backend functionality using Flask and for creating database and managing database I use SQLAlchemy.
- Designed and developed user-friendly interfaces for easy navigation.
- For Payment Gateway I use RazorPay.

Contact Management Application

- Developed a Contact Management application using ReactJS.
- Integrated a JSON Server for database.
- Implemented all the features of CRUD such as adding, editing, and deleting contacts.

Ecommerce Website

- Developed an ecommerce website using Python, Django and DRF.
- Implementing features such as product listing, shopping cart, and user authentication, Placing Order and Retrieving Order.
- Designing a responsive frontend using ReactJs.

MissLaundry App

- Developed an app for Misslaundry from React Native.
- For authentication I have use OTP verification.

Project Management Task (PMT)

- Developed an website for PMT using Django, HTML, Bootstrap and Javascript.
- For developing this I used Django-HTML, “ajax”, and added multiple filtration.
